

Böttcherin EG-60

De-Glazer

Uses

Böttcherin EG-60 is a special wash for deglazing blankets and rollers. Apply manually, Böttcherin EG-60 removes even solid, deep ink residues.

Characteristics

- high cleaning power
- cleans pores of blanket and roller surface
- removes glazing of printing blankets and rollers
- extends the cleaning periods and shortens lead times
- reduced amount due to slow evaporation
- free of aromatics
- short-time water miscible

Application

Böttcherin EG-60 should be applied to a cleaning rag and then wiped intensively over the blanket surface. The blanket should then be rinsed with water. For cleaning the roller Böttcherin EG-60 should be applied to the roller with the machine running slowly. The roller should then be rinsed with water. Repeat, if residues are considerable.

Wear protective gloves during application.

Marking

Böttcherin EG-60 is classified and marked according to EC- Directive 88/379/EWG - in its latest version.
