

Böttcherin HS

Wash for Heatset Web Presses

Uses

For use in automatic blanket washing systems in heatset presses. Also suitable for manual cleaning of ink rollers.

Characteristics

- flash point approx. 110 °C
- water miscible, corrosion inhibited
- very slow evaporation, low viscosity
- economic in use
- good cleaning power
- requires a water wash after the solvent cleaning cycle
- lower explosion limit of 41.0 g/m³ at 20 °C

Properties

Böttcherin HS forms a short-term emulsion with water, resulting in excellent removal of paper dust and ink accumulation.

Approvals

Böttcherin HS is approved by the manufacturers Heidelberg, MAN, KBA, Baldwin and Oxy-Dry for use in their machines. FOGRA certified.

Marking

Böttcherin HS is classified and marked according to EC-Directive 88/379/EEC - in its latest version. Böttcherin HS is not classified as a dangerous good in the sense of national and international transport regulations (GGVSE - ADR/RID - GGVSee/IMDG).
